

Art.No 41-10-00

Art.No 41-11-00

Carrying chair is designed for short term patient transport e.g. in stairs and lifts. The frame is made of aluminium. It has 2 pairs of carrying handles and patient restraints with quick release buckles. Because of two big wheels the chair is very stable and easy to operate.

The seat's fabric SCANPLAN is tested after DIN 5363 and DIN 4108B1 requirements. It is easy to keep clean.

The products fulfils the requirements of EN1865.
